Energy Efficiency and Auditing Course

(One Day Advanced)

A practical, interactive course. Tailored to train non-technical, semi-technical and technical Energy Personnel to calculate the amount of energy consumed and to develop strategies to reduce the demand of energy consumed. It is an understanding of audit requirements according to the AS-NZS3598; 2000. Some of what the participants will learn: Understanding energy saving devices, Understanding Demand and how it affects the network and the bill, Preparation of seasonal or monthly energy consumption profiles, Understanding energy tariffs, Preparation of written report to management, Preparation of prioritised list of energy reduction actions, Recommendations for further actions.
